Subject: RE: Problem Formulation for NMP

Jonathan,

Thank you for the update. We'll be finalizing these documents for all meetings and site visits, but they won't be publicly available until the problem formulations are posted.

And just yesterday I was told that the new release date for the problem formulations will be more towards end of January next year. I'll keep you updated as soon as a date is confirmed,

Ana

I take that back. We'd like to add the names of two Essex employees that were involved:

Plant Manager Jason Stephens
Engineering Manager Allen Guisinger.

Hi Jonathan,

Thank you for contacting me. I was about to send you an e-mail as well.

First, let me answer your questions. We are still working on the problem formulation documents. The release date has change a bit to early next year, but I don't have a clear deadline.

Unfortunately, we can't provide curtesy copies of the problem formulation until the documents are placed in the docket.

I can send you an e-mail once the problem formulation is available and a link to the docket.

I was going to contact you to let you know that we'll be adding a memo to the docket summarizing the site visit, which I'm attaching here for your review. If you can send me comments by COB tomorrow, that would be great.

Thank you,

Ana

Subject: Problem Formulation for NMP

Hi Ana,

I hope this email finds you well. I was reminded earlier today that EPA's problem formulation for the NMP Risk Evaluation is due later this month. I have a call scheduled on another topic with my magnet wire team next week and was wondering whether it would be possible to obtain a courtesy copy of the problem formulation prior to that so I could share with them? If not, is there a summary I can share? I imagine you all must be pretty close to final language at this point...

Thanks

Jonathan Stewart
